This is an overview of the four webinars presented by Brazilian universities that have listed Ohio State as a partner within the CAPES Print funding system. The Brazil Gateway team reached out to each university, coordinated with speakers, scheduled presentations, developed Sympla event pages that gathered information on each university and a registration process.

The webinars were hosted with the support of the Ohio State College of Food Agricultural and Environmental Sciences (CFAES) and Global One Health initiative (GOHi). Luis Canas, associate professor and interim director of international programs at CFAES, mediated the four events where Ohio State faculty were able to ask questions and introduce themselves. Four workshop sessions took place from June 16-July 14 on Tuesdays (except June 30) from 1-2 p.m. (BRT). The goal was to connect Ohio State faculty with top Brazilian universities and researchers to facilitate the establishment of collaborations that could benefit from the new Brazilian funding system and beyond.

CAPES PRINT - BRAZILIAN HIGHER EDUCATION INTERNATIONALIZATION FUNDING SYSTEM

CAPES is a well-known foundation connected with the Ministry of Education in Brazil. Print stands for Program for Internationalization. This program was launched in 2017 as a new funding system to support the internationalization of research and of graduate studies within Brazilian universities. The program was designed replace the Science Without Borders program as a means to continue investing in internationalization of higher education, but allowing universities more oversight and a better connection with research projects; therefore, facilitating future assessment. In 2018, 36 Brazilian universities were selected and four of these universities listed Ohio State as one of its foreign partners. CAPES Print aims to promote the development of strategic internationalization plans to improve the quality of Brazilian graduate courses and to draw greater international visibility to scientific research carried out in Brazil. Opportunities include Brazilian graduate students interested in being visiting scholars abroad and positions for graduate students wanting to be visiting scholars in Brazil, as well as Brazilian faculty nominating their foreign collaborators as visiting faculty in Brazil, and the establishment of research networks among universities.

CAPES PRINT IN NUMBERS

- Total amount for all universities selected: 300 million BRL = 60 million USD
- 36 Brazilian universities granted CAPES Print funding
- Duration of the program is 5 years (originally 4, but because of COVID-19, one year as added)

BRAZILIAN UNIVERSITIES THAT LISTED OHIO STATE AS PARTNER WITHIN CAPES PRINT

- University of São Paulo (USP)
- Federal University of Rio Grande do Sul (UFRGS)
- Federal University of Paraná (UFPR)
- Federal University of Paraíba (UFPB)
These universities are located and represent four of the five Brazilian geographic regions. USP is in the Southeast, UFRGS and UFPR are in the South, and UFPB is in the Northeast. This shows Ohio State has a broad reach and varied access to and participation in science and research in Brazil.

*University of the State of São Paulo (UNESP) is in the process of including Ohio State as a partner through a project with the Department of Spanish and Portuguese.
